

1. If an installation calls for a "double glue-down" it most likely will require
 - (A) Directly gluing the carpet to the subfloor
 - (B) Gluing tackless strips and then adhering the carpet to the strips
 - (C) Gluing a cushion to the substrate then gluing the carpet to the cushion
 - (D) Using a flexible adhesive layer to attach the carpet to the subfloor
2. What is the purpose of a class A ground fault circuit interrupter?
 - (A) for short circuit and ground fault only
 - (B) overload reverse current and ground fault
 - (C) overload and short circuit only
 - (D) overload short circuit and ground fault
3. A soffit that is attached directly to the underside of the rafter tails is called a(n) _____ soffit.
 - (A) enclosed
 - (B) open
 - (C) exposed
 - (D) vented
4. Which tool is provided on pattern to avoid sharp corners at the junction of two adjacent surfaces?
(Angle)
 - (A) Nut and bolt.
 - (B) Vice.
 - (C) Fillet.
 - (D) Fish plate.
5. The maximum tilting angle of the band saw machine is -----.
 - (A) 50.
 - (B) 35.
 - (C) 45.
 - (D) 40.
6. Lumber with the designation of _____ grade contains more defects than a finished grade lumber.
 - (A) Superior
 - (B) Clear
 - (C) Construction
 - (D) Select

Lather

7. Slightly crooked ceiling joists are sometimes straightened by the use of a
- A nosing
 - B ribband
 - C strongback
 - D neither
8. Vapor retarders based on their _____.
- A Color
 - B Weight
 - C Density
 - D Permeability
9. Wears better and is smoother
- A Attributes of Resin Panels
 - B Standard Thicknesses for Drywall
 - C Advantages of Plaster over Drywall
 - D Advantages of Prefinished Gypsum Wall Panels
10. Impervious to prolonged exposure to water or water entry
- A Watertight
 - B Corrosion Resistant
 - C Insulation
 - D Waterproof
11. staples used to fasten the base ply of a two-ply drywall installation shall be
- A 21 gauge
 - B 20 gauge
 - C 16 gauge
 - D 18 gauge
12. the installation of a new metal roof deck or metal roof panel without removing the existing metal deck or roof system. The new panels should span from joist to joist to joist over a minimum of two spans (and at least 3 joists, and be mechanically fastened to these joists in order to be able to support themselves
- A Coding
 - B Nesting
 - C Ponding
 - D Tracking
13. The strongest expression of light and dark are the colors white and black.
- A Itten's Light and Dark Contrast
 - B Itten's Complementary Contrast
 - C Examples of Subtractive Colors
 - D Neither

Lather

1181. for what period of time must the scratch coat be cured

- A not less than 72 hours
- B not less than 48 hours
- C not less than 24 hours
- D not less than 12 hours

1182. Of the following, the best undercoat for new wood casings is:

- A spar varnish
- B cementum
- C dentin
- D enamel

1183. What is the minimum amount of overlap for felt paper?

- A 8"
- B 2"
- C 4"
- D 3"

1184. What can be done to a nail to reduce the chance of the material splitting?

- A Blunt the point by hitting it with a hammer
- B Hammer really slowly
- C Cut off the point
- D Hammer really lightly

1185. What thickness is used as a base layer in multi layer applications?

- A 1/4" thickness
- B 2/4" thickness
- C 1" thickness
- D 3/4" thickness
